## COLLECTION

### *Grey + red*

*Sometimes, the best color schemes combine more than one shade of gray. The cool tones create a polished look while a fiery color like red brings passion and energy. Complete the look by splashing an earth tone on the walls to bring everything together.*

COLLECTION

## *NATURE*

If you are fond of the cold interior of the office space, even then it will be useful to add some warm accents. So, a delicate creamy-reddish shade will make the room comfortable and inviting – especially with the natural texture of wood. At the same time, it will shade the blue-gray gradient of the color palette, showing it from its best side.

## COLLECTION

### *DARK AND MOODY*

Greys and black are serious, creating a sense of both studiousness and drama. While a color scheme of greys and blacks is rather dark and moody, it's actually a great palette for offices where serious work takes place and you're handling important matters!

## COLLECTION

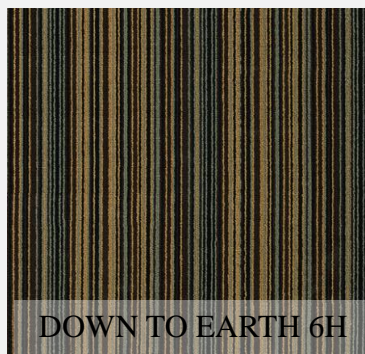

### *HARMONY*

We have before us a balanced color palette in the traditional Japanese spirit. Minimalistic, at the same time conveying the richness of natural earth tones with their warmth, tranquility, meditative balance. Brown beige, chocolate, cinnamon – these shades reveal their harmony near a warm gray tone; and the burgundy color serves as a modest and soulful accent of this gamma.

Carpet tiles with a simple pattern can be laid in different directions for both textural and optical effect.
